

ABSTRACT

VANE WITH MODIFIED BASE

A guide vane 1, such as may be used in a guide vane stage of a compressor (not shown), the guide vane comprising a main body 2 and a mounting base 4. In one aspect of the invention, at least part 22 of the mounting base 4 is aerofoil shaped.

In another aspect of the invention, the mounting base 4 projects outwardly beyond a surface 14 of the main body 2 on one side only of the guide vane 1.
